General Information

These specs contain relevant information about all display, video, Advanced TV and cross channel ad formats.

Please Note:

- Consider delivery time to GroupM Admanagement: There has to be a briefing at least **5 business days** prior to the start of the campaign to ensure that the campaign starts on time. Special formats, especially DCO, might require an extended lead time.
- A 1x1 frame with clear contrast to the content for all display advertising media must be present
- The delivery is done via redirects (exceptions are BTK's, Gaming, Audio and Advanced TV). All components of these redirects must be https-compatible.
- Delivery and Support: DX_DE_xaxis_ads@groupm.com & DX_DE_dmo@groupm.com
- For Nexus Select campaigns, ads are required physically.
- Additional 3rd-Party scripts / pixels can only be accepted when previously requested. **Still, Nexus data is relevant for billing.**
- Please make sure that all ad-components delivered are https-compatible.
- Delivery of streaming or rich media creatives is only possible if agreed upon with Sales & Consultancy: DX_DE_premiumsolutions_sales@groupm.com.
- In exceptional cases, a physical delivery can be made.
- Physical advertising material must be delivered as HTML5 (Display Ads) / jpg, gif / MP4 (Video Ads). All components of the advertising material must be https-compatible.
- For the physical delivery of advertising material (by arrangement with Sales), the Adition Specs must be observed. These can be found at:
https://wiki.adition.com/images/5/51/ADITION_HTML5_Specs_20_04_2020.pdf

Integrated Display - Native

Image/Text Combinations

Image specifications	File Format	.jpg, .png
	Format and Size	16:9 (1200x675 px) Optional: 4:3, 1:1, min. 1200 px wide
	File Size	100 kB (suggestion) We recommend delivering images, text and logo (optional) separately and not integrating them into the image in advance. The logo is not integrated into the image during playout. In exceptional cases, logos or text must be placed with a safe zone of 10% to the edge of the image. We also require the image in 16:9, 4:3 and 1:1 formats.
Text specifications	Note	Recommendation ads may be displayed title-only, depending on the publisher. Therefore, representative and meaningful headlines are recommended. The brand name can be displayed above or below the Copy Text, depending on the publisher.
	Headline	max. 25 characters (including whitespace)
	Copytext	max. 60 characters (including whitespace)
	Brandname	max. 25 characters (including whitespace)

Integrated Display - Native Image/Text Combinations

Specifications Image/Text Combination:

Tips & Tricks

Headline	<ul style="list-style-type: none"> • Use emotional images • Avoid logos, text and richly detailed images • Important elements should be displayed centrally if possible since images might be cropped
Copytext	The Copytext should only include relevant information.
Call-to-Action	The Call-to-Action Link activates the user to click and leads them to the landing page/target URL. e.g.: Inform now/Book here!/Order now!
Image	Avoid Logos, text and high detail in the visuals (scaling).

Integrated Display - Native Image/Text Combinations

Negative
Example:

Lorem ipsum dolor
Sit amet, consetetur sadip sing
elit, sed diam nonumy.
Sit amet

Too much text in the image creates confusion and makes the user lose interest as it might be perceived as illegible.

Positiv
Example:

Lorem ipsum dolor
Sit amet, consetetur sadip sing
elit, sed diam nonumy.
Sit amet

A clear image with a clear message and separate text for further information.

Please avoid

URLs in Text

Telephone numbers

Special characters

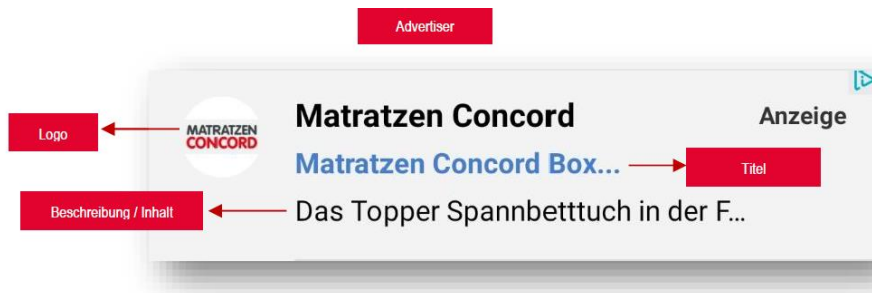

Umlauts

Too many numbers

Integrated Display - Native Inbox Ad

Image-/ Text-specifications	Advertiser	25 characters
	Title	25 characters
	Description/Content	90 characters
	Call-to-Action	15 characters (optional)
	Logo	160x160px

Example:

Integrated Display - Native Story Ad

Please note that the delivery of advertising media must be carried out at least one week prior to the scheduled campaign start and must be sent to DX_DE_plista_campaign@groupm.com & DX_DE_dmo@groupm.com

Halfpage Ad	Creative Dimensions	300 x 600 px
	Safe Zone* with CTA	300 x 486 px
	Safe Zone* without CTA	300 x 525 px
Billboard	Creative Dimensions	970 x 250 px
	Safe Zone* with CTA	970 x 135 px
	Safe Zone* without CTA	970 x 176 px
Please note	Visual (Image or Video)	<ul style="list-style-type: none"> – Video: physical video (mp4 etc.), 30 seconds max. duration (including all slots), autostart without sound, provision at best quality as MP4, MOV, AVI (recommended duration: max. 30 sec.) – Images: delivery at best quality as JPG, PNG, GIF
	Text	– is possible, will be placed on visual
	Features	<ul style="list-style-type: none"> – Multiple clickouts, flexible size, flexible duration of slots (time of slot), flexible quantity of slots (3 to 5 recommended) – Logo: JPG, PNG, GIF – aspect ratio 1:1

*“Safe Zone” refers the area in which texts, icons, symbols, emojis can be placed without overlay of StoryAd-Controls or StoryAd-Header. In the “Safe Zone” the design is free from constraints.

Integrated Display

Gaming

<p>Native In-Game Display</p>	<p>Please note: Native in-game display ads must be delivered physically (PNG, JPEG). The integration of scripts (ad server, adverification, etc.) is not possible. Only 1x1 impression trackers can be used. A click command cannot be integrated, nor can a landing page be included. Currently, ad verification providers have a very limited evaluation option.</p>	
<p>Halfpage Ad</p>	<p>Creative Size</p>	<p>300x600</p>
	<p>Max. Size Restrictions</p>	<p>200 kB incl. Fallback</p>

	Animation	not allowed
Mobile Interstitial	Creative Size	320x480 + 480x320 768x1024 + 1024x768
	Max. Size Restrictions	150 kB incl. Fallback
	Creative Format	HTML5
	Fallback	.png, oder .jpg
	Animation	not allowed

Guidelines Native In-Game Creatives

AVOID SMALL DETAILS AND USE HIGH-CONTRAST CREATIVES

Avoid small details and make sure the ad uses distinct high contrast colors in the ad creative. Doing so will increase ad exposure significantly and will allow the ad to be visible even when it's far away. This could lead to 10X higher overall ad exposure time, when the creative is big enough. Banners where the brand name/logo takes at least 30% of the overall creative image can result with higher brand recognition rates..

CREATIVE CONTENT - BEST PRACTICES

When using text in an ad creative it's important to follow the guidelines below, which will maximize the text readability and overall effect on the user.:

- Use a big, familiar and readable font
- Avoid using effects on the text such as shadows, tilting, and so on
- Make sure the text color and text background have high contrast to ensure the text stands out
- Short words and short overall text
- Use text that invites a later call-to-action (see examples below) or important information to the user, such as: „New things available“, „Discount XY“, „Short company slogan“

Integrated Video

Video

Rolls (Instream) & InRead (Outstream)	Please note	Only VAST tags can be accepted when DoubleClick redirects are delivered. Please also note that when using DoubleClick, only the largest video size (1280x720 or 720x540) needs to be delivered. Delivery is always cross-device.
	! Important !	(Please note: For Gaming and CTV the specs on the following pages apply)
Video

Display and video ads can be delivered as redirects.</p> <p>Please send the DOOH ads at least 7 working days prior and the CTV, video and display ads at least 14 and 5 working days prior to the start of the campaign to DX_DE_dmo@groupm.com and DX_DE_xaxis_ads@groupm.com.</p> <p>If you have any questions, please contact the DOOH team at programmatic-operations-de@kineticww.com or Nexus Support at DX_DE_dmo@groupm.com.</p>	

FOREWORD

Our technical specifications are continuously updated to reflect changes in inventories and from publishers. For this reason, they should only be accessed online in order to always receive the latest version.

In order to minimise the number of required ad media variants, we aim to find the greatest possible overlap for the existing requirements of publishers. Nevertheless, it is not always possible (depending on the booking combination of products) to fulfil all requirements with just one advertising medium.

GENERAL
REQUIREMENTS**Delivery of advertising assets**

- min. 10 WT before campaign start for standard campaigns (CTV and ATV)
- min. 14 WT before campaign start for bookings **incl. Netflix (CTV)**
- Lead times for campaigns with additional DCO (Dynamic Creative Optimisation) on request
- All advertising material components (tracking, URL references, etc.) must be SSL-compliant
- A target URL to the customer's landing page is required (see also ClickCommand p.3/3)
- Provision must take place "physically" via email or download (for exceptions, see Technical details)
- Provision of video creatives via 3rd party ad serving as **"VAST redirect" is not possible.**
- Provision of tracking pixels for 3rd party measurement (see p.3/3)
- The number of video files delivered per campaign should not exceed a maximum of 3 versions
- **Delivery & support:** DX_DE_dmo@groupm.com

Distribution of advertising assets

- Delivery is "non-skippable" on all inventories.
- Video creatives with in-between lengths (differing from exact lengths of e.g. 10s, 15s, 20s or 30s) may be rejected by some publishers due to a lack of controllability in the advertising block. We recommend creating video creatives with "exact lengths" (see general length limits in the technical details for inventories with a separate booking option on the next page).

COLOR-INTENS. FRAMERATE	32-BIT 25 fps		25 fps
AUDIO-TRACK (integrated audio track with identical length to the video file)			
FORMAT CODEC	MPEG Audio AAC-LC		MPEG Audio AAC-LC
BITRATE BITDEEP	min. 192 kbps 24-BIT		min. 192 kbps 24-BIT
SAMPLINGRATE	48 KHz		48 KHz
CHANNELS	2 Kanäle (stereo)		2 Kanäle (stereo) 8 Kanäle (1+2 dt. Sendeton, 3-8 Stille)
VOLUME LEVEL*6	-23 LUFS (+/-1 LUF)		-23 LUFS (+/-1 LUF)

*1 BVOD- & Streaming CTV: Specifies potential broadcast video on demand (BVOD) offers from TV channels as well as offers from streaming portals such as Netflix, Amazon Prime, Disney and others. YouTube is a separate booking option with different requirements (see above). *2ATV: Specified participating channel from Linear TV on the ATV channel (AddressableTV). ATV is also a separate booking option with different requirements. The provision of at least 2 video files is required for use. The above information also applies in cases of cross-screen deliveries (CTV) outside the big screens.

*2 Video duration: The above video lengths represent the maximum coverage of inventories in CTV and ATV (without guarantee in individual cases). Restrictive requirements must be taken into account, especially for "streamers" (but not exclusively). When delivering videos shorter than 15s (min. 10s), "potential" deliveries to Amazon Prime (including Freevee) and Disney+ are generally excluded. This also applies when delivering non-exact video lengths (e.g. intermediate length 17s). In cases of intermediate lengths, there will be no "potential" delivery to Netflix in addition to streamers (Prime, Freevee, Disney). Videos longer than 30s must be requested in advance.

*4 File weight: Results from the permissible or required bitrate multiplied by the video length. *5 Video hosting in the YT customer account required. + Settings: public or not listed| no true streaming| possible for embedding. *6 Volume: Per EBU-Norm R128

3rd Party Measurement

Impression Tracking	The use of 1x1 impression trackers is possible under GDPR and ePrivacy compliance as well as the limitations below.
Limitation (Impression Tracking)	Depending on the platform/inventory provider, only a limited or no selection of tracking providers is accepted. Therefore, it cannot be guaranteed that the "desired" tracker will be available on all advertising spaces. Any counting differences resulting from missing certifications or permissions to measure must be disclosed by the third-party provider (this information is usually not shared with us by the measurement service). Furthermore, any type of tracking other metrics than those required for reporting campaign performance, such as user identification, user profiling, user retargeting, or conversion tracking, is not permitted.
Ad Verification / Validation	The status for ad verification and validation services is strongly dependent on the certification levels of individual services on the respective app inventories, given the current lack of comprehensive standard integrations in the CTV environment. It is expected that measurement results in this area will be inconsistent and fragmented. The verification service used must clarify whether negative or missing measurements are due to actual incidents or whether there are underlying reasons related to certification levels or missing prerequisites for measurement on the respective offerings.
Billing	Only ad impressions that have been reported through our primary services are relevant for billing. Counting differences can only be discussed if they have been proven and shared by the third party based on valid and comparable data, as well as transparent collection methodology.
ClickCommand	In the streaming TV environment, ads are generally placed in non-clickable environments. Clicks are therefore not reported. Nevertheless, it is mandatory to provide a landing page (TARGET URL) in order to serve "isolated" clicks. See also QR code (below).

3rd Party Ad Serving

VAST Wrapper (Redirect-Tag)	A physical video file of the highest possible quality must be delivered to ensure requirements of our offerings and limitations of programmatic supply chains. See YouTube exception in Technical Details.
------------------------------------	--

Ad Content *(The advertiser is responsible for the complete declaration of necessary information in writing and, where necessary, by sound. The points listed below are not exhaustive; additional information may be required depending on the advertising content).*

Pharma	Advertising materials for pharmaceutical products must contain the pharmacist's reference (visual and audio).
Gambling	Advertising material on the subject of gambling must contain an addiction notice, the "SchleswigHolstein" notice and an age notice.
Automotive	Sellers must specify the specific consumption values and CO ₂ emissions.
Black bars	Letterboxing and pillarboxing - black borders to adjust aspect ratio - within the provided video source file are not accepted.
QR-Codes	The integration of a QR code in the video is not allowed for Netflix. Integration into videos for delivery on other streaming platforms and apps must be agreed in advance, as a separate process will be required.

Note on advertising for alcoholic beverages

General Information	As a rule, advertising for alcoholic beverages may not go on air until after 5 p.m. Stricter restrictions apply to "hard" alcohol (>15% vol.) (see below). Disney and Spielberg content is not advertised with alcohol at all. Allday advertising (at least beer, etc.) is allowed on sports channels
Strong alcohol	Beverages with an alcohol content greater than or equal to 15% vol. may only be advertised after 8 pm. In addition to the above content restrictions, inquiries should be made with individual publishers to determine if there are any other restrictions.

Stream Green

Display	Logo	.eps, .svg or .png
	Font	.otf, .ttf or .woff
	Images	.gif or .jpeg
	Copy	Maximum 40 characters per message
	CTA	Maximum 20 characters per CTA (any buttons or arrows should preferably be delivered as .svg, .eps or .png)
	Disclaimer	Maximum 60 characters
	Layout template	Instructions of where and when to place graphics – preferably with a reference image or video (minor HTML5 animations, such as hover effects are possible)
InBanner Video	Logo	.eps, .svg or .png
	Font	.otf, .ttf or .woff
	Video	Maximum 30 sec and preferably as .mp4 with maximum resolution (no weight limit), if available, please send videos in 1:1, 4:5, 9:16 and 16:9
	Copy	Maximum 40 characters per message
	CTA	Maximum 20 characters per CTA (any buttons or arrows should preferably be delivered as .svg, .eps or .png)
	Disclaimer	Maximum 60 characters
	Layout template	Instructions of where and when to place graphics – preferably with a reference image or video (minor HTML5 animations, such as hover effects are possible)
Hinweis	<p>For Stream Green campaigns, only the above-mentioned assets need to be provided. The ad is created by GroupM itself and is carried out in coordination with the agency.</p> <p>If you have any questions, please contact: DX_DE_premiumsolutions_sales@groupm.com</p>
